

Summary of KASB data

1. Morris County hit our peak population in 1910. Since then the county has had a declining population.
2. Unless something significant happens, there is no reason to believe this trend will reverse.
3. The enrollment at Morris County Schools has been declining for many years. Though there are years where the enrollment will increase, the trend line is down.
4. Our student population is more mobile than it has been in the past with almost a quarter of our students turning over on a regular basis.
5. The district tends to see a portion of 8th grade students from PHMS not enroll at CGHS.
6. PH schools has a declining enrollment trend.
7. CGHS will see a significant decline in student enrollment in the coming years. Its overall trend line is down as well.
